

# Music **Option 1**

*Can you make an Instrument at home?*

*Can you make your own instrument?*

*Can you follow instructions to successfully make a Straw Harmonica?*

## What you will need:

- A number of drinking straws...I suggest 8 or 10 !
- Sticky Tape
- Scissors
- Ruler
- Pen/Pencil

## Method:

### Step 1:

Cut a long strip of sticky tape and put the straws on the sticky side.

### Step 2:

Secure well with more sticky tape so that the straws will not move around. Carefully, cut your straws in groups of 2, beginning with short (higher pitched) through to full length straws.

### Step 3:

If you have coloured sticker paper, you may choose to decorate your instrument. I chose to use coloured straws in this example.

### Step 4:

Your attempts to extract a harmonious sound may now begin!
